## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the amended claim 25. Therefore, the claimed limitations of the “trimboard members as extension of a building wall set at opposite sides of window placement to define sides of a window opening” and the “J-shaped bracket having selectively long and short legs and a base therebetween” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 1794

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 25 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification of the present invention does not provide sufficient support for the underlined portions of the claimed limitations: "a window frame and support members, trimboard members as extension of a building wall set at opposite sides of window placement to define sides of a window opening, a window with frame members, a series of first rigid J-shaped clips for cooperatively securing one of the window trim boards to a surface of a building and to a window side frame member; and a second rigid J-shaped clips for cooperatively securing the other window side frame member to the surface of the building, each J-shaped bracket having selectively long and short legs and a base therebetween."

Art Unit: 1794

If any of these limitations are explicitly supported by the original disclosure, applicants should indicate the page and line numbers where support is found in the original disclosure. If support is considered to be implicit, applicants should clearly explain how these limitations are derived from the original disclosure.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 25, line 3, there is also insufficient antecedent basis for the term "window placement". It is unclear what "the trimboard members set at opposite sides of window placement to define sides of a window opening" means.

It is also unclear if the term "trimboard members" recited in line 3 is the same as the "window trim boards" recited in line 7.

In line 8, it is unclear if the second clip is a clip or "clips".

In line 10, it recites the limitation "each J-shaped bracket having selectively long and short legs and a base therebetween." There is insufficient antecedent basis for the "J-shaped bracket." It is unclear if the J-shaped bracket is referred to both first and second rigid J-shaped clips.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
